About Us

HBB Marble, which began its operations in 2008 with natural stone quarry management initiatives, exports to many countries around the world, primarily the United States and Middle Eastern countries, with a total workforce of over 1,000 employees across its group companies. HBB Marble has 8 active quarries throughout Turkey, and the main products extracted from these quarries are produced under the HBB Marble brand, including “HBB Empire Beige, HBB Aqua Grey, HBB Arabescato Grigio, HBB Shellstone , HBB Noble Beige, HBB Limestone HBB Master Cream, and HBB Volcano Black Basalt.” With our quarries possessing highquality reserves, our company continues its operations with an annual production capacity of approximately 1,500,000 tons. By keeping pace with technological innovations and continuously raising production standards, our company is rapidly pursuing factory investments in addition to new quarry investments, expanding its existing factory with a capacity of 576,000 m²/year. Having started its institutionalization activities in 2018, our company continues its projects aimed at establishing a corporate resource planning infrastructure in production, management, and service processes, and ensuring rapid growth and increased competitiveness through capacity development. Our company offers its block, slab, and dimensional natural stone products to its valued customers under the slogan

“As it was created...”
