ELECTRONIC DETECTION SYSTEMS

Our company continues its activities with electronic detection systems on Afyonkarahisar - Ankara highway.
Electronic Detection Systems: 2 pcs

SOLAR ENERGY SYSTEMS

Installed Power	12,72 AC MW
Annual Capacity	20 mio kWh
Planned Power	15,84 AC MW

GEOHERMAL GREENHOUSE

Production Area	50.000 m ²
Production Capacity	2.500 Ton

About Us

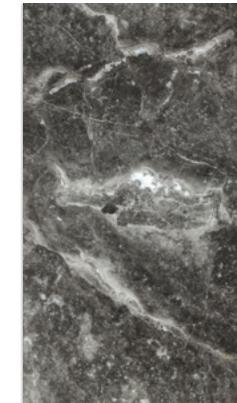

HBB Marble, which began its operations in 2008 with natural stone quarry management initiatives, exports to many countries around the world, primarily the United States and Middle Eastern countries, with a total workforce of over 1,000 employees across its group companies. HBB Marble has 8 active quarries throughout Turkey, and the main products extracted from these quarries are produced under the HBB Marble brand, including “HBB Empire Beige, HBB Aqua Grey , HBB Arabescato Grigio, HBB Myra Shellstone, HBB Noble Beige, HBB Limestone, HBB Master Cream, and HBB Volcano Black Basalt .” With our quarries possessing high quality reserves, our company continues its operations with an annual production capacity of approximately 1,500,000 tons. By keeping pace with technological innovations and continuously raising production standards, our company is rapidly pursuing factory investments in addition to new quarry investments, expanding its existing factory with a capacity of 3.076,000 m²/year. Having started its institutionalization activities in 2018, our company continues its projects aimed at establishing a corporate resource planning infrastructure in production, management, and service processes, and ensuring rapid growth and increased competitiveness through capacity development. Our company offers its block, slab, and dimensional natural stone products to its valued customers under the slogan **“As it was created...”**

PRODUCTION CAPACITY QUARRY STRENGTH

Our natural stone portfolio is backed by a strong quarry infrastructure, offering distinct character and color variations.

With a total annual production capacity of **565.000** tons, we ensure reliable supply for large-scale international projects. High-capacity quarries provide continuity and efficiency, while boutique operations enable controlled extraction for exclusive and bespoke applications.

Limestone Quarry – 120.000 Tons

Empire Quarry – 180.000 Tons

Myra Shellstone Quarry – 80.000 Tons

Noble Quarry – 50.000 Tons

Master Cream Quarry – 30.000 Tons

Aqua Grey Quarry – 25.000 Tons

Arabescato Grigio Quarry – 30.000 Tons

Volcano Black Basalt Quarry – 50.000 Tons

This balanced capacity structure enables us to operate with flexibility and strength across diverse markets and project scales, allowing us to deliver both high-volume commercial developments and prestigious architectural projects with precision, consistent quality, and a strong commitment to excellence at every stage of production.

FACTORY CAPACITY

Our production facilities operate with a total annual processing capacity of 3.076.000 m², supported by modern technology and efficient manufacturing systems. This infrastructure ensures consistent quality, precision processing, and reliable delivery across global markets.

Slab Factory – 1.500.000 m²

Burdur Factory – 500.000 m²

Bazalto Factory – 576.000 m²

Elmalı Factory – 500.000 m²

With this strong and well-structured production network, we are fully equipped to deliver high volume commercial projects and customized architectural applications with the same level of flexibility, operational excellence, and commitment to quality.
